PROSPECTUS OF THE ATLANTIC MONTHLY.

For 1862.

THE January number will commence the Ninth Volume of this Magazine. Its very large and still increasing circulation, is a gratifying evidence of public approval, and no industry will be spared to render the forthcoming volume adequate to the requirements of times so pregnant with great events as those of to-day. The life of the Republic, the best interests the nation, demand of literature a manly and gen erous action, and the conductors of this ournal will remit no efforts in collisting the best talent of the country to support with vigor and clo-quence those opinions and principles which brace the great public heart to stand firm on the side of Freedom and Right. An elevated na-tional American spirit will always be found il-lustrated in these pages. The Atlantic Montaly will never give other than the best literature, and its attractions better each month than the

Among the contributions already in hand for 1862, the following will commend themselves as sufficient inducements for every family to provide the forthcoming numbers for household reading.

Professor Agassiz will begin in the January number a series of articles on Natural History, and other kindred topic, to be continued from month throughout the year. The name of so distinguished a man of science in connection with this approuecement, is a sufficient guaran-tee of the great benefit to be derived from his monthly contributions.

A new Romance by Nathaniel Hawthorne, will appear in the pages of the Atlantic Monthly early in the year.

A New Story by late Theodore Witthrop, author of "Cecil Dreeme," will be commenced in the January number;

Intermittent Fever, or Fever and Ague, Remittent Fever, Chill Fever, Dumb Ague, Periodical Headache, or Bilious Hendache, and Bilious Fevers, indeed for the whole class of diseases originating in biliary derangement, caused

by the Malaria of miasmatic countries. No one remedy is louder called for by the necessities of the American people than a sure and safe cure for Fever and Ague. Such we are now enabled to offer, with a perfect, certainty that it will eradiento the disease, and with assurance, founded on proof, that no harm can arise from its use in any quan-

That which protects from or prevents this disorder must be of immense service in the communities where it prevails. Prevention is better than cure, for the patient escapes the risk which he must run in violent attacks of this baleful distancer. This "Cuna" expeis the miasmatic poison of Faven and Adur. from the system and prevents the develop-ment of the disease, if taken on the first approach of its premonitory symptoms. It is not only the best remedy ever yet discovered for this class of complaints, but also the chapest. The large quantity we supply for a dollar brings it within the reach of every body; and in bilious districts, where FEVER body; and in bilious districts, where Freeza AND Acus prevails, every body, should have it and use it freely both for cure and protection. It is hoped this price will place it within the reach of all—the poor as well as the rich. A great superiority of this remedy over any other ever discovered for the speedy and certain cure of Intermittents is, that it contains no Outside or mineral consequently it was no Clumine or mineral, consequently it pro-ducts no quinism or other injurious effects whatever upon the constitution. These cured

by it are left as healthy as if they had never had the disease. Fever and Aque is not alone the consequence of the min matic poi on. A great variety of disorders wise from its irritation, among which are Neuralgia, Ringumatism, Gout, Headache, Bind ess, Toorische, Ears is: Catarri, Asth-ms, Palpitation, Psinful Affection of the Spices, Hysterics, Pain in the Bowels, Colic, Paralysis, and Derangement of the Stomach, all of which, when originating in this cause, put on the intermittent type, or become periodical. This "Curr" expels the poison from the blood, and consequently cares them all alike. It is an invaluable protection to immigrants and persons travelling or temporarily residing in the malarious districts. If taken occasionally or daily while expessed to the infection, that will be excreted from the system, and cannot necumulate in sufficient quantity to ripen into disease. Hence it is even more valuable for protection than cure, and few with ever suffer from Intermittents, if they avail themselves of the protection this remedy af-

are so composed that disease within the range of their action can rarely withstand or evade them. Their penetrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find hybealth or energy restored by a remedy at once sesimple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanae, containing certificates of their cures and directions for their use in the following complaints: Costingness, Heartburn, Headache arising from disordered Stomach, Nausea, Indigestion, Pain in and Morbid Luaction of the Bouels, Flatulency, Loss of Appelite, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions. They are an excellent alterative for the renovation of the blood and the restoration of tone and strength to the system debilitated by disease.

When once tried, its superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate.
